

## Weather Studio Echo Problem Made “Fidelity-Perfect” with Echo Eliminator™

**W**eatherNation in Excelsior is indebted to a long list of vendors and suppliers, who turned our vision of a state of the art weather center and studio into a profitable reality. We installed the studio, lights, HD cameras and servers, only to realize that we had a noticeable echo in our weather segments, one that made us cringe every time we cued up the video clips. So we contacted Acoustical Surfaces, Inc. for a solution. *Within a few days they installed a fantastic, totally recycled material that soaked up extraneous sounds in the weather studio and improved our sound quality dramatically. I couldn't believe my ears! I am indebted to Keith Johnson and his remarkable team at Acoustical Surfaces: true perfectionists*

*who solved our problem quickly, in a very cost-effective manner. We live in a world where people are quick to criticize and slow to pay a well-deserved compliment. I want to go on record saying that Acoustical Surfaces is an extraordinary business with effective solutions to any noise problem. I am a true believer, and wouldn't hesitate to recommend their services to anyone who wants the job done right, from day 1. Thank you for making our WeatherNation segments “fidelity-perfect!”*

*I am genuinely impressed with your crew and we're very pleased with the results. Thanks for scrambling so quickly and turning us into believers!*

*Paul (Douglas Kruhoeffler) Meteorologist*

**Reverberation Time:**  
**Before 1.70 Seconds**  
**After .61 Seconds**
