Fabric Wrapped Panel Testimonial

Testimonial from Acoustical Surfaces Inc. customer Paul Speer:

I recently sold my commercial recording studio near Seattle and moved to Memphis. The house my fiance and I purchased has a “bonus” room that I knew would work well for my downsized studio. Unfortunately, the room had reflective parallel walls with really awful wallpaper on them.

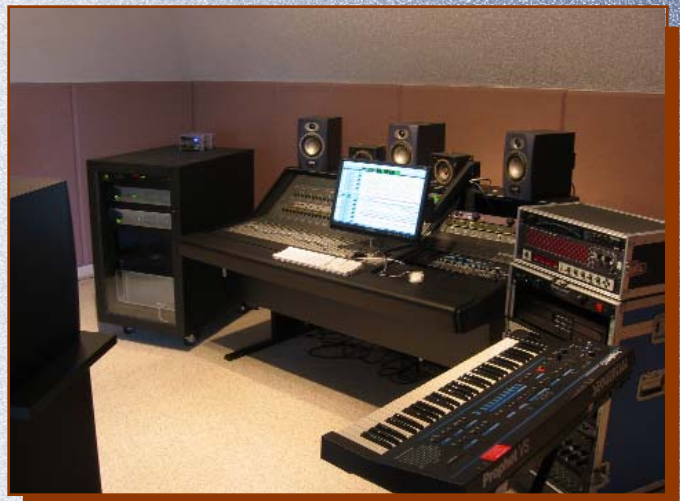

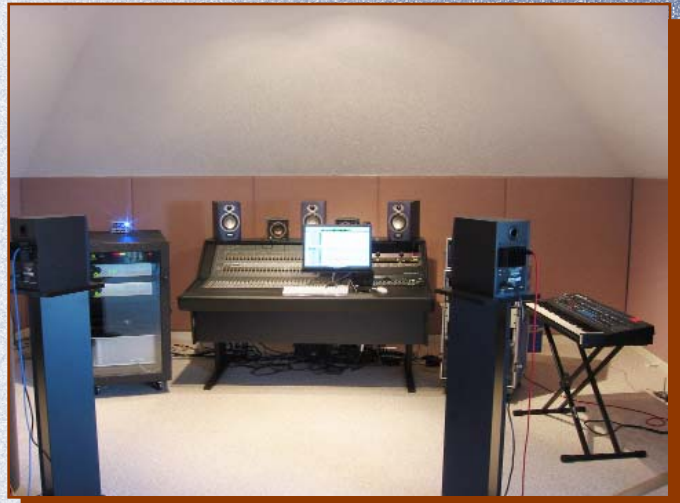

I googled “acoustic panels” and clicked on Acoustical Surfaces Inc. *It was obvious from their website that they knew what they are doing so* I called the company. I provided some details of the space and they were extremely helpful in giving me various options to improve the listening environment.

We decided the 1" Fabric Wrapped Panels would be an excellent choice in terms of effectiveness and budget. They were relatively easy to install, look good, and the room sounds great now. ***I highly recommend Acoustical Surfaces Inc. to anyone needing to improve the acoustical properties of an existing space.***

Sincerely,
Paul Speer
